

**Cary: On-site pharmacy coming to Health Care Center January 2012**  
***The addition of a pharmacy at the HCC will provide added convenience to all employees and dependents covered by the SAS Health Care Plan***

SAS is pleased to announce the next step in the growth of the Cary Health Care Center (HCC): the addition of a full service pharmacy, coming January 2, 2012!

The addition of a pharmacy at the HCC will provide additional convenience to all employees and dependents covered by the SAS Health Care Plan. HCC patients will no longer have to drive to another location to pick up prescriptions.

The HCC pharmacy, which will be operated by Walgreens, will fill prescriptions written by SAS HCC providers as well as those written by providers in the community.

Only minor internal and external construction is needed to get the pharmacy up and running and is scheduled to begin later in July. This should cause minimal to no disruption to HCC services or HCC patients.

More details about the new on-site pharmacy will be shared as they become available in the coming months.
