WEBINAR: THE MAVENS OF BIG DATA

THE ROLES & TECHNOLOGIES CHANGING THE FACE OF BUSINESS

Big data has ushered in a host of new technologies as well as development and usage models. Open source projects have become software products, end users have become knowledge workers, statisticians have become data scientists, and new chief officers are on the rise.

How is big data affecting your organization and how are you using it to improve the lives of your customers in real-time?

Join us for this series starting on February 11th to explore this big data paradigm as we offer you our perspectives on:

- The people who will make organizations successful
- The role of data for developing the ultimate customer experience
- Enabling technologies – The Hadoop Ecosystem
- The value proposition for big data analytics – how much is your data really worth?

Real-Time Data Analytics for Critical Asset Performance

How to get business value from real-time data

- Found on the [SAS.com website](https://www.sas.com)

You already have the raw material needed to detect future asset failures. That data is flooding in right now via your sensor equipment.

But is that data in good shape? Is it good quality? And can you access and analyze it fast enough to make strategic business decisions and prevent equipment failure?

FREE TRAINING!

SAS Programming 1: Essentials

[Overview](#)[Prerequisites](#)[Course Outline](#)

This course is for users who want to learn how to write SAS programs. It is the entry point to learning SAS programming and is a prerequisite to many other SAS courses. If you do not plan to write SAS programs and you prefer a point-and-click interface, you should attend the [SAS Enterprise Guide 1: Querying and Reporting](#) course.

This course can help prepare you for the following certification exam(s): [SAS Base Programming Exam for SAS 9](#), [SAS Certified Clinical Trials Programmer Using SAS 9](#).

Statistics 1: Introduction to ANOVA, Regression, and Logistic Regression

[Overview](#)[Prerequisites](#)[Course Outline](#)

This introductory course is for SAS software users who perform statistical analyses using SAS/STAT software. The focus is on t tests, ANOVA, and linear regression, and includes a brief introduction to logistic regression. This course (or equivalent knowledge) is a prerequisite to many of the courses in the statistical analysis curriculum. A more advanced treatment of ANOVA and regression occurs in the [Statistics 2: ANOVA and Regression](#) course. A more advanced treatment of logistic regression occurs in the [Categorical Data Analysis Using Logistic Regression](#) course and the [Predictive Modeling Using Logistic Regression](#) course.

This course can help prepare you for the following certification exam(s): [SAS Certified Clinical Trials Programmer Using SAS 9](#), [SAS Statistical Business Analysis Using SAS 9: Regression and Modeling](#).

Learn how to

- generate descriptive statistics and explore data with graphs
- perform analysis of variance and apply multiple comparison techniques
- perform linear regression and assess the assumptions
- use regression model selection techniques to aid in the choice of predictor variables in multiple regression
- use diagnostic statistics to assess statistical assumptions and identify potential outliers in multiple regression
- use chi-square statistics to detect associations among categorical variables
- fit a multiple logistic regression model.

SAS TUTORIALS

Free SAS Tutorials

View SAS training "how to" videos, tutorials, and demos to learn tips and tricks for working with SAS software.

The image shows a screenshot of a video player interface for a SAS tutorial. The player has a light blue border and standard window controls (minimize, maximize, close) in the top right corner. On the left side of the player, there is a large blue circular button with a white left-pointing arrow. On the right side, there is a large blue circular button with a white right-pointing arrow. The video content area displays a thumbnail for the tutorial "Getting Started with the SAS® Windowing Environment". The thumbnail features the SAS logo, a play button icon, and the text "run;". To the right of the thumbnail, the title "Getting Started with SAS Windowing Environment" is displayed in bold. Below the title, a description reads: "Learn how to perform basic programming tasks in the SAS Windowing Environment." At the bottom of this text area is a blue button with the text "View Now".

SAS TALKS

SAS Talks is a webinar series featuring technical presentations by SAS experts, instructors, authors, customers and students. Monthly live webinars are [archived](#) for later viewing, and related resources are offered within each area.

A screenshot of a webinar card interface. The card has a blue border and a light blue background. On the left, there is a square portrait of a man with short brown hair, wearing a dark suit, white shirt, and a patterned tie. To the right of the portrait, the text "Machine Learning Using SAS® Enterprise Miner™" is displayed in a bold, dark font, followed by "On-Demand" in a smaller, regular font. Below this, a paragraph of text reads: "Watch this on-demand webinar and learn about the extensive machine-learning algorithms included in SAS Enterprise Miner." At the bottom center of the card is a blue button with the text "View Now" in white. The card is flanked by two large, circular blue buttons with white arrows pointing left and right. In the top right corner of the card, there are four small, light blue circular icons arranged horizontally. A large, faint, light blue watermark with the text "SAS Talks" is visible across the background of the card.

ASK THE EXPERTS

Hidden Gems in SAS Enterprise Guide

This session looks at both new and existing functionality of SAS Enterprise Guide to help both novice users and long-time programmers. Learn about filtering options, task and code templates, prompts, computed columns, subqueries, adding SAS code to a process flow and more.

[Register for live event](#) >

A Deeper Dive into SAS Enterprise Guide Reporting

This session will review creating a simple row and column report, creating a graph or chart, adding a prompt and combining reports together in the report builder.

[Register for live event](#) >

Top 10 Ways to Optimize Your SAS Code

In this session, learn tips and tricks to make your SAS code run more efficiently. There are at least six ways to do most things in SAS, so understanding some coding guidelines can help to guide efficient decisions. Some tips include: limiting the amount of data read, index usage, and efficient conditional processing.

[Register for live event](#) >

Exploring SAS Stored Processes

In this session, using SAS Enterprise Guide we will illustrate how to access and analyze data. Creating SAS Stored Processes from a SAS Enterprise Guide project. Creating SAS Stored Processes from existing SAS programs. Accessing SAS Stored Processes from a variety of SAS client applications.

[Register for live event](#) >

What's New in 9.4 Foundation for Programmers

In this session, you will learn about the new features and functionality of SAS 9.4.

Meet SAS® Analytics U

The go-to place for all you need to know about teaching and learning SAS

WHY?

Professors and Teachers

SAS University Edition has a lot to offer:

- **Free SAS software** to use in statistics and quantitative methods classes in a variety of areas: economics, psychology and other social sciences, computer science, business, medical/health sciences, engineering, etc.
- **Free teaching and curriculum development materials** – everything you need to teach a course using SAS.
- **Statistical software that works the same on PCs, Macs or Linux workstations**, so traditional barriers to students, like cost and operating system, are a thing of the past.
- **An online community for SAS academic users** where you can interact with each other, get support, access SAS resources, etc.

Students and Learners

You've got a lot to gain from SAS University Edition:

- **Free SAS software** you can use in introductory to advanced-level statistics and quantitative methods classes, or in self-directed learning.
- **Highly sought-after analytical skills** that will be in demand by employers around the world.
- **Free video tutorials** that will teach you the basics of SAS programming and statistical analysis.
- **A fun interactive community** for SAS academic users, where you'll find forums, software support, instructional videos and more.
- **A consistent user experience** across all applications, whether you're working on a class project or doing self-study.

Features

- **An intuitive interface** that lets you interact with the software from your PC, Mac or Linux workstation. Learn more about [SAS Studio](#).
- **A powerful programming language** that's easy to learn, easy to use. Learn more about [Base SAS](#).
- **Comprehensive, reliable tools** that include state-of-the-art statistical methods. Learn more about [SAS/STAT](#).
- **A robust, yet flexible matrix programming language** for more in-depth, specialized analysis and exploration. Learn more about [SAS/IML](#).
- **Out-of-the-box access to PC file formats** for a simplified approach to accessing data. Learn more about [SAS/ACCESS](#).

Access to SAS software is just the beginning.

In addition to world-class analytical software, SAS Analytics U also offers a variety of resources and ways to connect with fellow SAS Analytics U-sers (See what we did there?).

Join our [online community](#) to access additional resources for teaching, learning and research, such as:

- Free e-learning resources and tutorials, including SAS [Programming 1](#) and [Statistics 1](#).
- Opportunities to connect and share in online forums for teaching and learning.
- Access to the SAS Analytics U [Facebook page](#), [LinkedIn group](#) and [YouTube playlist](#).

Join our online community

THANK YOU
