

## SAS® inSchool

Improve and expand educational opportunity through THE POWER TO KNOW®.

### Enhancing the K-12 learning environment

Imagine being able to ask questions and get accurate answers today. SAS is dedicated to helping create a culture where consistent, reliable data drives all decisions surrounding the K-12 learning environment — from the district operations to the classroom to an individual student's learning plan. SAS provides a full suite of software solutions and strategic services designed to access information, create intelligence and predict outcomes in K-12 education to meet your bottom line — improved student performance.

#### How can you:

- Integrate technology and curriculum?
- Enhance student achievement and teacher effectiveness?
- Meet individual teaching and learning needs?

Curriculum Pathways® is an award-winning Web-based product that covers all of the core disciplines — English, science, mathematics, social studies and Spanish — for grades eight to 14. Curriculum Pathways enables students and teachers to find the information they need, at the precise moments they need it, in the specific formats they require.

#### How can you:

- Give every student sufficient opportunity for academic growth?
- Evaluate the effectiveness of programs and instructional approaches?
- Target resources where they are most needed?

SAS EVAAS® for K-12 is a powerful Web-delivered tool that provides additional focus on the individual student and supplies a precise measurement of each student's progress over time, as well as a reliable diagnosis of opportunities for growth. Educators can be proactive, making sound instructional choices and using their resources more strategically.

#### How can you:

- Bring together data on student achievement, finances, human resources and district operations to make informed decisions?
- Recruit and retain the best teachers and anticipate future program requirements?
- Optimize operations and ensure fiscal accountability to support student achievement?

SAS intelligence solutions for K-12 are based on a single information framework for data integration, reporting and analysis — the SAS Enterprise Intelligence Platform. Our targeted, data-driven decision making solutions also allow institutions to improve learning and district management in a variety of areas:

- Student learning outcomes and analytics.
- Budgeting and reporting.
- Human capital management.
- No Child Left Behind Act reporting and accountability.
- Scorecards and performance management.
- IT management.

## Getting everyone on the same page

SAS seeks to improve and expand educational opportunity by working to fulfill the promise of integrating technology and education. By providing the best software and services to align existing data systems, SAS provides information sharing that gets everyone — faculty, students, administrators, researchers, policymakers and others — on the same page.

---

## Education Success Stories

### Poway Unified School District (CA)

- **Challenge:** Meet the mandates of the No Child Left Behind Act while improving financial management across the district.
- **Solution:** SAS Data Warehousing provides insight to improve student achievement, and SAS Financial Management enables more proactive management of finances and helps “learning to drive the budget.”

### East Carteret High School (NC)

- **Challenge:** Incorporate technology into the curriculum to help students better understand traditional concepts.
- **Solution:** Curriculum Pathways allows students to take charge of their learning with an engaging approach and helps teachers differentiate instruction and convey core concepts more effectively to students based on individual learning styles.

### Battelle for Kids (OH)

- **Challenge:** Pursue an initiative that champions improved student achievement in Ohio.
- **Solution:** Using SAS EVAAS for K-12, the group designed a value-added pilot initiative to help Ohio school districts analyze student performance data in an effort to raise student achievement levels.

### Berks County Intermediate Unit (PA)

- **Challenge:** Integrate technology into the instructional plan to make teaching more efficient and learning more profound.
- **Solution:** Curriculum Pathways provides an engaging approach for teachers to convey information to students while making better use of technology resources.
