

# **A way to quickly find all of your project code**

**Dr. Arthur Tabachneck**  
**Director, Data Management**

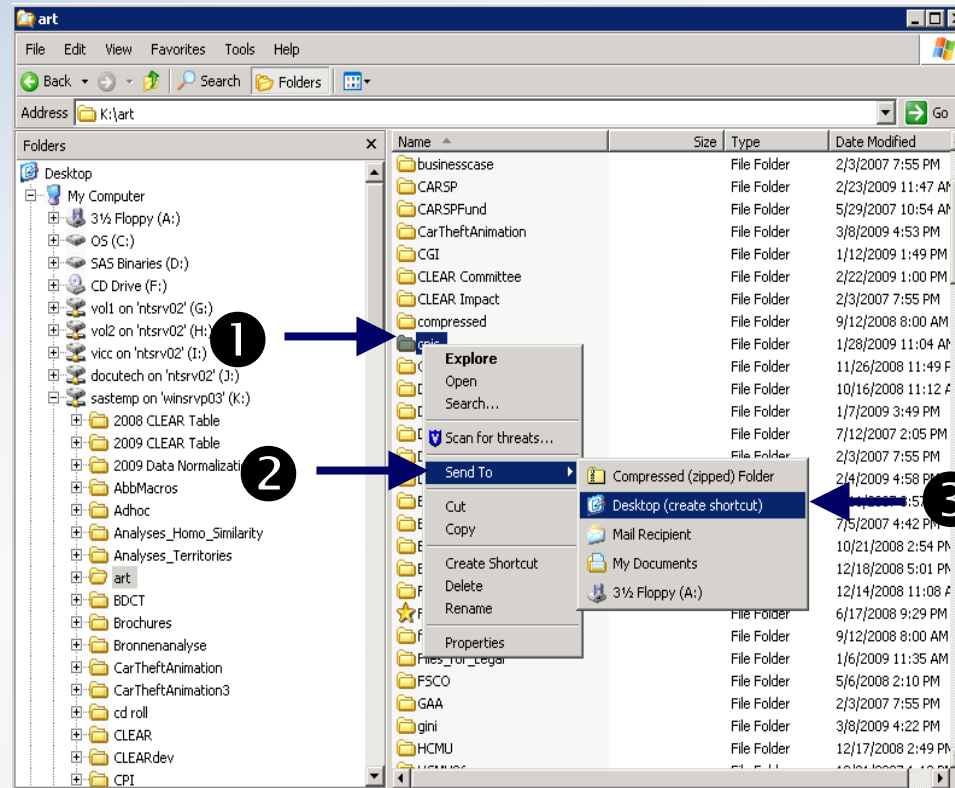

## My Window's Desktop

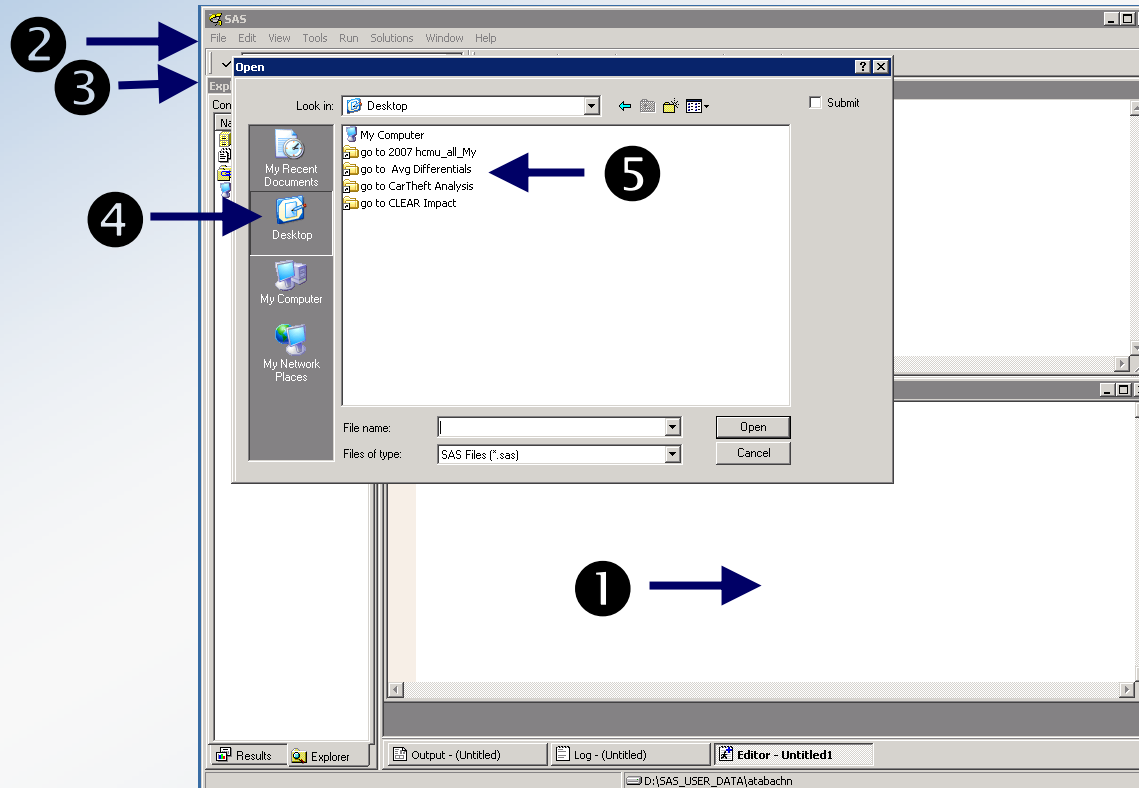

from window's explorer right click on project folder

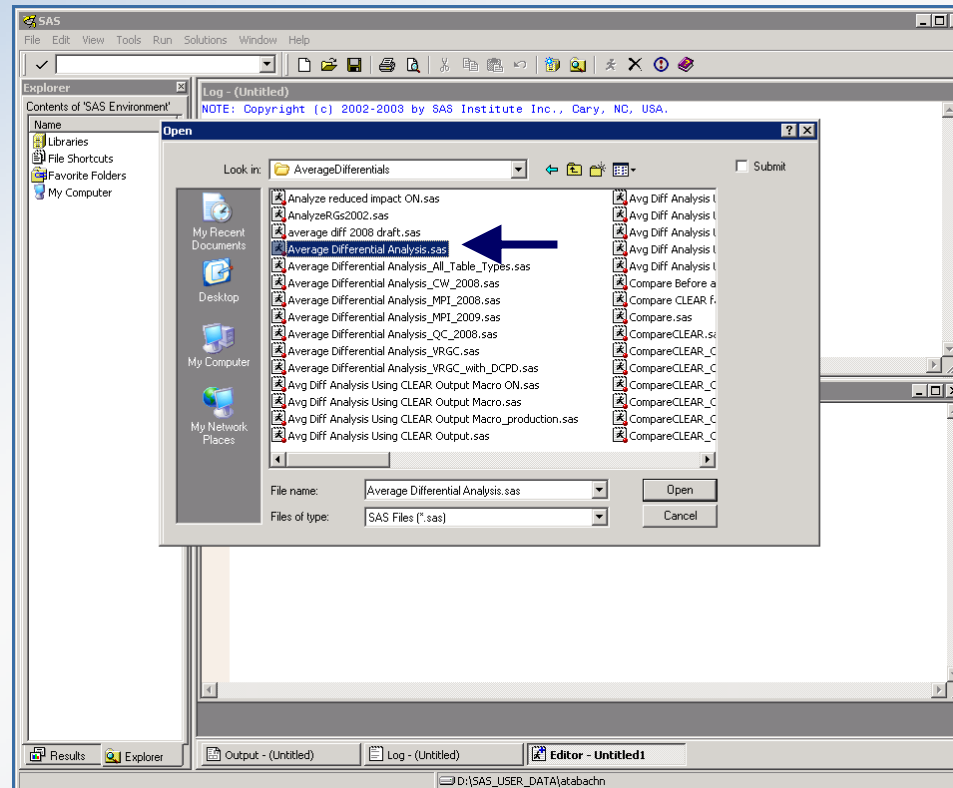

then, to access any project folder from SAS

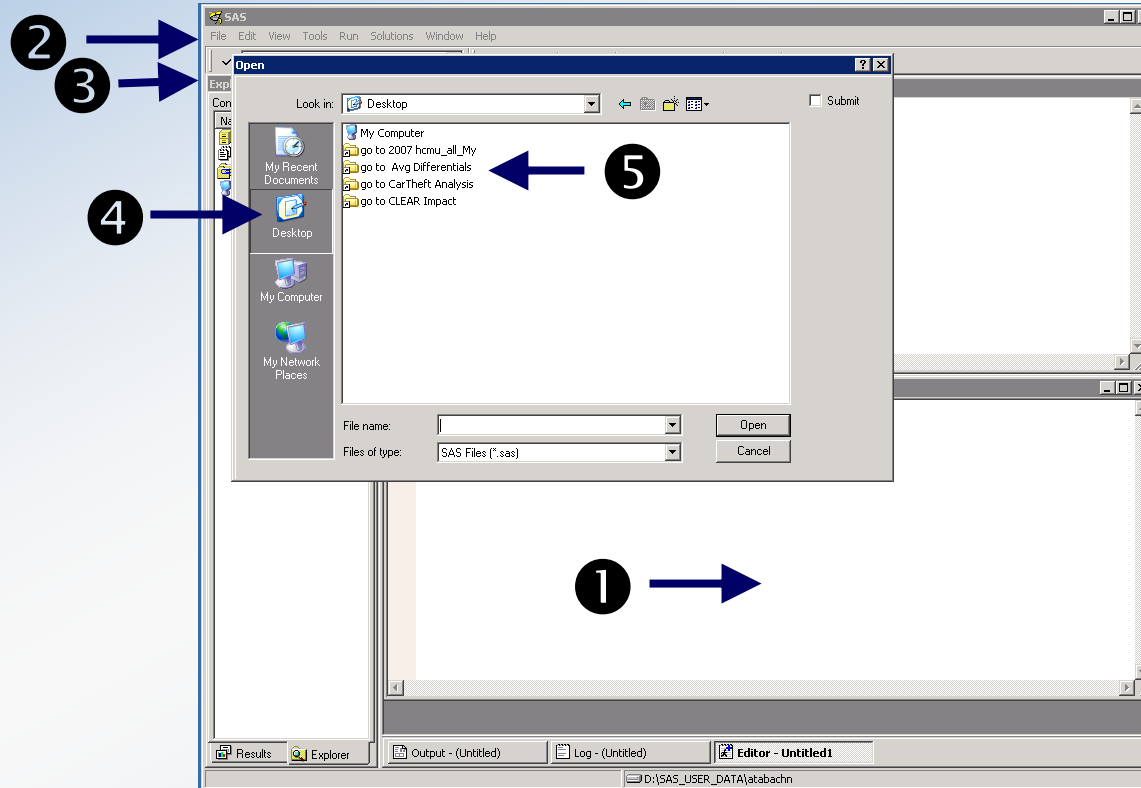

from there, select the program you want to work with

to change projects, just repeat the last two steps

## **Extra Benefits**

**works from multiple instances of SAS**

**doesn't require any add-ins**

**is totally managed by you**

**Questions?**
