

## **Fulton Lee (Con't)**

**Family:** Single

**Pets:** None

**Sports/Hobbies:** Volleyball, ultimate Frisbee, camping and canoeing, coaching volleyball, home improvements

**My ideal weekend would be...** on a road trip in a convertible, have a nice dinner with friends and family, being outdoors.

**Favourite Foods:** Chinese, Thai and Indian.

**If I could be anything at all (besides a SAS Consultant)...** I would be a beach volleyball player.

**Something I've learned out in the field doing consulting work for SAS that I feel would benefit other SAS users ...** In many larger organizations you can have multiple admin administrating the Metadata Server to do this, edit the admin.txt file located in:

..\Lev1\SASMain\MetadataServer\admin.txt

Restart the MetadataServer after editing the admin.txt

The MetadataServer will now enable the additional users to be able either be an unrestricted user or one with administrative privileges.
