

Accessing Information Using the SAS Information Delivery Portal

This Level I course is for end users of the SAS Information Delivery Portal who want to customize their view of their organization's existing SAS Information Delivery Portal. This course requires the SAS 9 Intelligence Platform.

Duration: 1.0 days

Course Description [\[Click to register ONLINE \]](#)

This course focuses on using the SAS Information Delivery Portal to view content developed in the SAS Business Intelligence environment. You learn how to navigate through the pages and portlets of the Portal. You learn how to add new pages and portlets to your view of the Portal, as well as how to add SAS Information Maps, SAS Web Report Studio reports, and SAS Stored Processes to your Portal pages.

Prerequisites

No SAS experience or programming experience is required although you should have some computer experience. Specifically, you should be able to

- log on and off a computer
- use a keyboard or mouse
- use a Web browser to access information.
