

Using SAS Web Report Studio for Thin-Client Reporting

Duration: 1.0 days

This Level I course is intended for anyone with little or no experience in other reporting tools or database technology. This course requires the SAS 9 Intelligence Platform.

Course Description [\[Click to register ONLINE \]](#)

This course provides an overview of SAS Web Report Studio. SAS Web Report Studio enables non-technical business users to find, interact with, create, and share reports based on corporate data. You learn how to navigate the SAS Web Report Studio interface and how to build simple and complex reports that surface information from tables, OLAP cubes, and SAS Stored Processes.

Prerequisites

No SAS experience or programming experience is required although you should have some computer experience. Specifically, you should be able to

- log on and off a computer
- use a keyboard or mouse
- use a Web browser to access information.
