

SAS® Global Certification

A World of Opportunity

SAS® Certified Platform Administrator for SAS® 9 Credential SUPPORTS: **CITREP** EXPANDED

Exam to complete:

SAS® Platform Administration for SAS® 9

Audience

Successful candidates should have experience administering the SAS 9.1.3 and 9.2 platforms and the ability to demonstrate the skills and knowledge necessary to:

- Secure the SAS configuration on each server machine.
- Check status and operate servers.
- Monitor server activity and administer logging.
- Establish formal, regularly scheduled backup processes.
- Add users and manage their access.
- Establish connectivity to data sources.
- Set up and secure metadata folder structures.
- Administer repositories and move metadata.

Exam Content

Security

- Secure a SAS platform configuration.

SAS® Server Operations

- Manage metadata repositories.
- Identify the properties and functionality of SAS servers.
- Validate a SAS server.

SAS® Server Monitoring

- Administer SAS server logging and modify logging configurations.
- Monitor SAS servers.
- Troubleshoot basic SAS server issues.

Backups

- Back up the SAS environment.
- Restore the SAS environment.

Administering Users

- Manage connection profiles.
- Manage roles.
- Register users and groups in the metadata.
- Give users access to processing servers and data servers.
- Determine when to store passwords in the metadata.

Administering Data Access

- Register libraries and tables in the metadata.
- Update table metadata.
- Pre-assign a library.
- Troubleshoot data access problems.
- Use the metadata LIBNAME engine.

Securing Metadata

- Identify how the metadata authorization layer interacts with other security layers.
- Identify where, how and to whom metadata permissions are assigned.
- Determine the outcome of metadata authorization decisions.

- Use metadata permissions to secure metadata.
- Create and use Access Control Templates.

Moving Metadata

- Promote metadata and associated content.
