

## SAS® RAPID ADOPTION SERVICE

### ■ Key Benefits

- **Completely Tailored Training:** We will customise your training from the specific SAS tasks to be learned right down to your company logo and colours on the learner's "Learning Dashboard" interface.
- **Realistic Training Environment:** Our lessons are recorded on your system, providing a "learn by doing" simulation environment which includes your data. Hence, This mirrors your working environment with realistic screen navigation and scenarios.
- **Improved Knowledge Retention:** Our training materials are available in three modes, "Show me", "Train Me" and "Test Me", each one providing varying levels of interactivity to enhance knowledge retention and adoption of new practices. As the training materials reflect your working environment they also act as ideal reference materials.
- **Job-Specific, Targeted Content:** We will develop training materials aimed squarely at specific job-roles and audiences.

**THE  
POWER  
TO KNOW®**

The SAS® Rapid Adoption Service will help you to quickly implement and, crucially, adopt new processes, policies and applications. It enables you to design, develop and deliver computer-based SAS training for multiple users around your organisation. Making it easy for your teams to learn or update the specific skills they need to operate your SAS deployment.

### Service description

The SAS Rapid Adoption Service uses an innovative simulation authoring tool, with it we will help you to quickly create your own simulations, documentation and help files to fast-track the learning process when staff are presented with new SAS implementations or upgrades to existing applications.

Users can then be trained simultaneously across multiple locations, and at their own desktops – using the simulation programme as 'standalone' training or as part of a 'blended' programme involving more traditional approaches such as classroom-based, instructor-led tuition.

We will also work with you to generate reports on training progress and assess user competence after training; helping you to monitor the effectiveness of existing education programmes and to identify new learning requirements.

The SAS Rapid Adoption Service is offered in association with our partner company STT (Software Training Technology) – the enterprise application training division of Kaplan IT Learning.

### Service activities

During a rapid adoption project our Education consultants will work with you to create a tailored training programme. Specifically, we will will:

- Review project requirements with your training and documentation developers
- Establish specific training requirements for individuals and groups
- Determine any new content development requirements
- Configure standard content in our authoring environment
- Develop customised training materials to agreed standards for the target applications.

### Service deliverables

Once the project is completed, our Education consultants will provide you with:

- A repository of agreed simulated lessons
- Training manuals to support each lesson.

---

## Estimated Duration

---

Project duration will vary in line with a customer's particular requirements and with the services provided on or off site as needed.

---

## Estimated Price

---

Please contact one of our SAS Education Business Development Managers on 0845 402 9902 or email [education@suk.sas.com](mailto:education@suk.sas.com) for more information on pricing.

## ■ The SAS Advantage

We understand and can apply SAS technology better than anyone else. Our development expertise spans three decades, and our experience with customers around the world is unrivalled. You can rest assured that with every engagement, our methodologies and best practices will deliver tangible results for your organisation.

Now, with the SAS® Rapid Adoption Service, you can create your own accurate, highly-detailed SAS computer-based training material in house to drive adoption of new business processes and meet your present and future training needs.
