

**No one
provides a platform
for SAS like
Mainline Information Systems.**

Mainline is IBM's largest Tier 1 Solutions Provider and Reseller, providing its customers with the entire portfolio of IBM's servers, storage, and software products, as well as implementation services and support. Mainline has also joined the SAS Alliance as a Consulting Partner, Services Partner, Reseller Partner, and Solutions Partner. Together, SAS and Mainline form a comprehensive partnership that uniquely positions them to offer their customers complete business intelligence and analytics solutions, from conception to implementation.

Why Mainline?

- Mainline is a total Solutions Provider - hardware, software, services, financing, hosting
- One vendor, one provider, one company responsible to make it work
- 4,000 current satisfied customers
- 250 sales and technical specialists
- Over 300 technical certifications
- Active across all industries

Mainline's SAS Business Services

- SAS certified consultants and architects
- Design, implementation, application development, assessment and migration services
- Platform expertise in IBM zSeries, pSeries, iSeries, xSeries and Storage products
- Operating System expertise in IBM zOS, zVM, AIX, OS400, Windows and Linux
