

SAS® OnDemand: Business Intelligence

All organizations have data. And they all want to gain insights and intelligence from it. How can everyone access the data they need, quickly derive the intelligence they seek and not create their own version of the truth?

The SAS OnDemand: Business Intelligence offering makes all these things possible by providing query and reporting capabilities together with the power of SAS analytics and data integration. SAS OnDemand: Business Intelligence is one component of the SAS OnDemand suite, a collection of full-service, hosted solutions that help you integrate business intelligence (BI) rapidly into your existing business environment.

These solutions provide the information you need to drive your business forward quickly. The SAS OnDemand approach frees resources within your organization and allows you to focus on other projects. Our approach also ensures that you have world class SAS analytic technology driving your organization's success. For more on SAS' industry-leading BI capabilities, see: <http://mediaproducts.gartner.com/reprints/sas/vol5/article8/article8.html>.

THE RIGHT DATA TO THE RIGHT USERS

The SAS OnDemand: Business Intelligence offering delivers consistent representation and control of information by providing reliable results that easily can be traced back to the source. This alleviates the repetitive task, prevalent in many other BI solutions, of validating which reports or results are correct. In addition, the solution's integration with Microsoft Office allows you to assure consistency of information for Excel users. You can integrate data from across your enterprise and deliver fast access to self-service reporting and analysis to all levels of users. Easy-to-use interfaces make it simple for decision makers to get the answers they need—saving you time while driving better decisions.

WHAT DOES THE SOLUTION DO?

This SAS OnDemand offering enables you to take advantage of extensive BI capabilities that are based on OLAP cubes as well as relational data. Capabilities include:

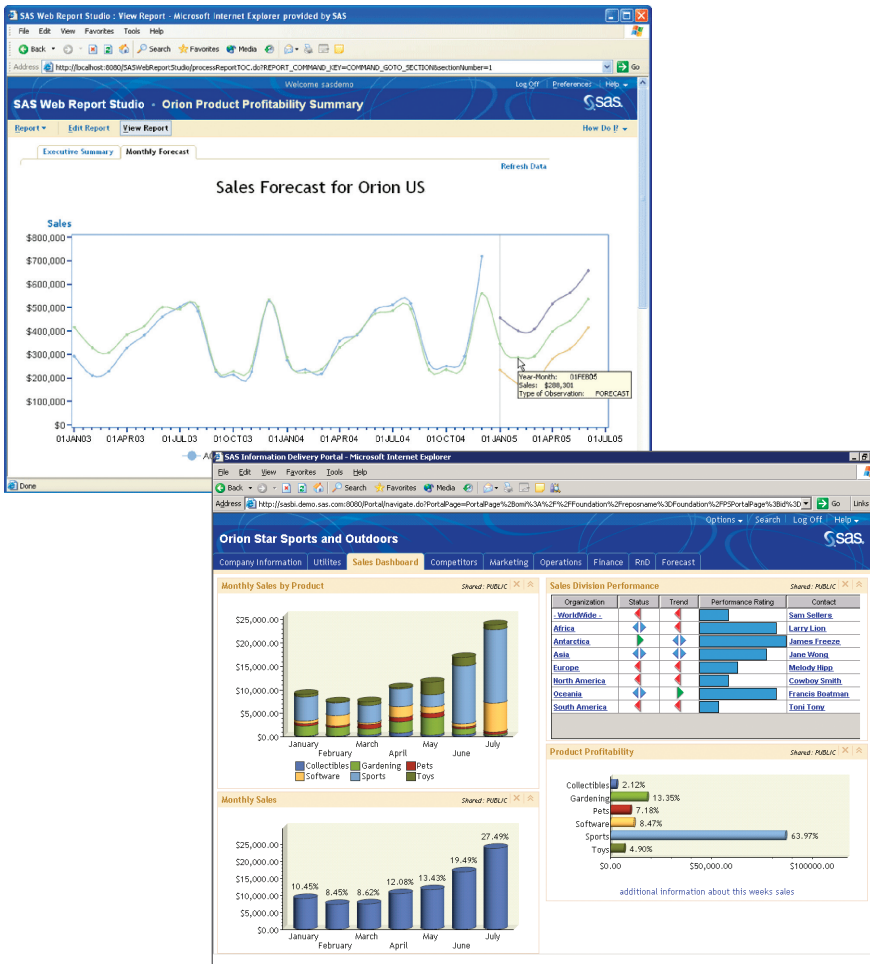

- Web-based portals/dashboards.
- Web-based report viewing.
- Web-based report building.
- Microsoft Office integration.
- PDF report output.
- Zero-footprint client.
- Point-and-click wizards.
- Customized graphical or tabular dashboards so that users easily understand key indicators.
- The ability to link to more detailed information as you go.
- Reporting based on OLAP cubes and/or relational data from one or more data sources.

- Multidimensional data exploration: drill, rotate, filter, reorganize, sort, toggle totals, export to various target formats such as Microsoft Office and PDF.
- A scalable, secure, robust data mart set up for your use by the SAS Solutions OnDemand team.

CLIENT ENVIRONMENT

All SAS Business Intelligence clients run in a Windows desktop environment using Windows (x86-32): Windows 2000 Professional or Windows XP Professional. Internet Explorer 5.5+ is the application viewer.

Call us toll free at 1-800-727-0025 (U.S. and Canada).

Quality, security and service

The SAS OnDemand: Business Intelligence offering includes:

- A 99 percent uptime guarantee.
- SAS-70 and Systrust Certification that assure quality and secure infrastructure services.
- A proven approach to solution development and deployment that provides high-value solutions without project risk.
- Proven SAS expertise.
- Proven, scalable SAS applications and infrastructure.
- A single contact who will help you resolve issues and answer questions.

SAS provides a broad range of reporting options from simple lists to complex, dynamic Web-enabled graphical reports complete with drill-down. Any type of user is thus empowered to create and use reports with tools appropriate to their business needs and level of ability.

SAS gives you the option of using our hosted solution for as long as it meets your needs. If you want to bring the application in house, SAS also provides the option of leasing SAS Business Intelligence Server.
