

Enter your thesis in the SAS Thesis Competition for a chance to win 10.000 kroner!

SAS Institute invites students to submit their thesis in our annual thesis competition awarding projects that work with new and solid ways of data analytics. There is data in everything from the groceries we buy at the supermarket, to the movies we watch on Netflix and to our choice of education, life partners, mortgages and jobs. With the increasing datafication of our daily lives, the value created from data analytics is immense. At SAS Institute, we wish to award students that have taken on the challenge of data analytics and management in their thesis. So if you have worked with **data modelling, analytics, visualization or statistics** in your thesis then this competition is for you!

Criteria

The SAS Thesis Award will go to a project, which demonstrates new and innovative ways of working with quantitative analysis. In the selection of the winner, consideration is also given to the originality of the application of statistical or analytical tools, as well as the thesis' ability to account for data management. Further, the evaluation will consider the ability to disseminate your academic results and knowledge to the public.

How to enter

If your thesis fits the criteria and is submitted between January 2016 and April 2017 then you are eligible.

To participate, you must submit a one-page summary of your thesis with your supervisors name and signature as well as the thesis and the grade you received (if this has been given) to Academic.dk@sas.com.

The deadline for applying is **1st May 2017**.

We look forward to receiving your application!
