

Around the House Putt Putt

Build your dream putt-putt course inside or outside (or both)!

1

Draw it out! Design your course on paper. How many holes will it have? What will "par" on each hole be?

2

Gather materials! Maybe you want your course to go up the stairs - put cardboard on the stairs to make a ramp. Maybe you want obstacles or a windmill! Legos, stuffed animals, magnetic building tiles are all great options to build with.

3

Tee Time! If you have a putter, great! You can also use a yardstick or broom handle. A ping pong ball is great for indoor putt-putt.
