

Shark Tank

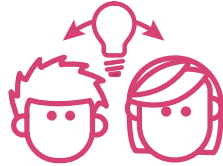

Get your thinking caps on!

Can you think of something that would make people's lives better or easier?
Maybe it's a physical product or an app. This is your chance to create it!

1

BRAINSTORM!

2

DRAW IT OUT!

Make a blueprint of what you want to create. What will its features be?
How much will it cost to make, and how much will it cost to sell?
Use internet searches to help you.

3

CREATE!

If it's a physical product, build a prototype.
If it's an app, build an image board of what it will look like.

4

PRESENT!

Present your idea to your parents. Ask them for their "investment" in the idea. Their investment could come in the form of extra dessert, extra screen time, later bedtime, etc. Remember - to get what you want in investments, you will need to offer a product that is useful to your parents.

**No parental supervision needed.
Activity designed for ages 8-12.**
