

Signal app for fast communication

How to join Signal and the Nordic & UKI SAS Innovate group

- Go to your app store and search for
- Inst  Signal
- Follow the instructions
- Please use **Your Full Name** both in Name and Nickname (Pietari Koskela, PietariKoskela) so we know who is texting us.
- Join the SAS Innovate 2024 group:
https://signal.group/#CjQKINikP5ZFJR1T8xT8YZFRkH9sxDJVQl0Aumr2JyrP95FEhDHAeim5_LcJck1wOn3lgy3
- Allow Notifications
- Next slide for Why Signal

- The app supports localization. The screenshots examples are from Norway:

The Signal App Signal

Fast Messaging & Communication during SAS Innovate

- As a group with people from the Nordics, the UK, and Ireland, where we can send quick messages to the group or single persons:
 - Share information and meet-ups
 - Look for someone to meet. Some travel alone, some want to speak to industry-related colleagues, etc.
- **Examples**
 - "The bus is leaving in 10 minutes. Make sure you are in."
 - "We have something to eat here. Come and join us if you like (map of shared location)."
 - "The Hotel Shuttle will pick us up from XX here (map of shared location)."
 - "I'm lost! Where is everybody?"
 - "We are around the corner in the bar."
 - "Tired, I went home."
 - "We are taking an Uber to a shopping mall. If you want to join us, meet outside the hotel at 14:30. There are two free seats."

• Why Signal?

- Considered safer than other messaging apps (WhatsApp, Messenger)
- It does not acquire unnecessary info from your phone.
- Does not tie to big social media companies, Meta (Facebook) or Google.
- Better message security and encryption.
- <https://signal.org/>
- Works well – so please add it!
