

SAS[®] and Cloud Computing

SAS Cloud offerings

Software as a service

Off-the-shelf offerings designed to scale and fit for purpose. Sign up, log in, and get to work. Can be modified for future needs.

Results as a service

Give SAS your data and problem, and we give you the answers on which you can take action.

Managed services

Your software or infrastructure can be hosted or remotely managed by SAS experts 24/7.

What does SAS do in the cloud?

SAS[®] on Cloud Providers

General support for cloud providers

Support to run SAS products on cloud infrastructures. Customers follow system requirements and policy on virtualized environments.

Cloud deployment patterns

Support cloud (e.g., containers, orchestration) so that you can deploy SAS in a variety of cloud infrastructures.

Cloud-specific offering

Specific offers and deployment best practice for cloud infrastructure providers as well as Managed Analytic Service Providers.
