

# SAS® Cloud

## Results as a Service

Not every organization has the tools and expertise to turn data into insights you can use. But even if you don't, you can still get answers to your business problems with results as a service. You provide the data and business problem; we combine the power of SAS Analytics with the know-how of SAS experts to deliver results you can act on.

### HOW IT WORKS

**You provide:** The business problem and the data.

**We provide:** The results, using our experience, technology, people, IP and infrastructure.

### KEY BENEFITS

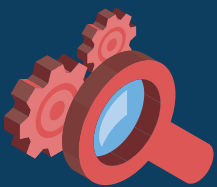

#### Expert Help

Address your toughest business issues without having to recruit, train and retain in-house analytical talent. You'll have access to SAS professionals with the knowledge and expertise you need.

#### Fast Turnaround

Get faster answers to your key business questions. We provide the right blend of technology and business expertise to deliver more powerful solutions that quickly produce results.

#### Insights

Our experts have worked with our global client base to solve a variety of problems in every industry. We use that experience to help you conquer your business challenges.

#### Flexible Deployment

Choose the delivery method that works best for your business. We offer multiple options through cloud-based or on-site deployments.

#### Maximum Impact

With the capabilities of the entire SAS Platform at their disposal, our analytics experts use the best software and take the best approach to deliver the best results for you.

#### Faster, Measurable ROI

Realize value quickly with our services-oriented approach. Cloud-based deployment means no on-site software installation. And SAS experts supply the knowledge and know-how for finding true analytical insights fast.

### YOUR DATA. OUR EXPERTISE. FASTER, DEEPER INSIGHT.
