

Run SAS® Anywhere on SAS® Viya®

Up your game with SAS desktop modernization

Would you like to program with SAS anywhere?

Access data anywhere with new SAS/ACCESS® engines designed for the latest modern data repositories.

Bring SAS to your data

Runs as a Docker container

Imagine running SAS on your laptop while also having the ability to quickly spin up a session on the cloud as needed! SAS can now run anywhere you need it, including Windows, Linux and Intel Macs.

Access any data anywhere

All SAS/ACCESS engines included

Take advantage of the most up-to-date features and improve query performance by using the engine designed for your data source such as Snowflake. SAS Viya CI/CD ensures that you'll always have the latest data access engines as developed.

Python integration

Proc Python in SAS Viya

The procedure enables you to run statements from the Python programming language within SAS code. Submit statements from an external script or enter statements directly.

Why move your SAS desktop to SAS Viya?

Affordable

Includes all SAS Viya access engines for one price

Portable

Runs on Docker/
runs nearly anywhere

Scalable

Big jobs can now run on any size machine

Manageable

Containerized deployments are easy to manage
