

RSV vaccine for adults at the HCC

CDC recommends that **adults 60 years of age and older may receive a single dose of RSV vaccine using shared clinical decision-making (SCDM)**, meaning that patients should discuss with their healthcare provider whether RSV vaccination will be beneficial.

The HCC will administer RSV vaccine to SAS employees and dependents on the SAS PPO medical plan and to SAS retirees with COBRA coverage.

All RSV vaccine administered at the HCC is obtained through the HCC Pharmacy with a provider prescription order and billed to the SAS PPO medical plan.

The HCC does not stock RSV as a routine vaccine due to its narrow recommendations for use, high cost, unpredictable demand, and short shelf life.

Retirees not on COBRA should discuss the vaccine with their primary care provider, to decide if the vaccine is right for them.

RSV vaccine is expected to be covered by insurance including Medicare Advantage plans per the Inflation Reduction Act.
