

A POWERFUL COMBINATION

SAS® + IBM Power Systems™

SAS® Viya® on IBM Power Systems™ delivers faster time to insights to drive digital decisioning at scale.

sas viya

DECISION FOCUSED

Make better decisions by simplifying model deployment and centrally monitoring performance of all your analytic models.

DEVELOPER FRIENDLY

Embed SAS Analytics in your applications using public APIs from the language of your choice.

AUTOMATED

Maximize efficiency by automating data preparation, machine learning and AI deployment.

GOVERNED

Provide secure management of models, pipelines and templates. Monitor activity through auditing and data lineage.

DATA DRIVEN

Access all types of data (relational, unstructured, text, images and audio) wherever it resides.

IBM Power Systems

FAST TIME TO INSIGHT

Complete critical jobs in real time, acting on real-time data on superior architecture to make fast decisions.

MINIMIZED TCO

Pay for what you use down to the minute and scale when you need more, leveraging cloud economics no matter where you deploy. Condense workloads to a single system, lowering costs and using your full analytics capability without bottlenecks, errors or downtime.

DEPENDABILITY

Secure your most important data with hardware that embeds security at its core and has been named the most reliable in the industry each of the past 12 years.

IT'S A WIN-WIN FOR YOU

Get industry-leading analytics and superior compute and storage – together.

ACCELERATED INSIGHTS

Accelerate the journey from data to decision with the best analytics, storage and compute capacity.

FULL ANALYTICS LIFE CYCLE SUPPORT

Operationalize analytics and easily adapt to changing business demands.

MAXIMUM RESILIENCE

Deliver continuous operations for analytics insights whenever you need them.

FLEXIBLE DEPLOYMENT

Enable agile IT with flexible deployment options, on-demand scaling and workload management.

Now, more than ever, you need to stay ahead of the competition. SAS Viya on IBM Power Systems gives you the edge you need in an ever-changing business environment.
