

Analytics for telecom

Stay ahead of the competition by accelerating data-driven business innovation.

Telecom organizations must proactively respond to fierce competition, decreasing margins, growing fraud threats, and the accelerating need for network investments. SAS enables you to harness data and make faster, trustworthy decisions to provide the best connectivity and digital experiences to secure a sustainable, profitable future.

How does SAS help?

Solving your data conundrum and enabling AI to support growth, innovation and differentiation.

Benefits

- Enable effective, quality rollout of 5G network and new offerings.
- Drive cost optimization/digital transformation for faster value.
- Instill trust and deliver a great customer experience.
- Provide frictionless service while proactively preventing fraud and risk.
- Optimize network operations and supercharge innovation.
- Gain fast, trustworthy insights into the customer's intentions.
- Confidently make decisions for customer loyalty/revenue assurance.
- Enable cross-functional collaboration to streamline business support.

Use cases

Telenor relies on SAS to adapt to rapidly changing customer expectations, enabling it to provide fast, personalized customer service based on real-time analytics that generates growth and loyalty.
