## Data science rewards innovative minds – across industries and interest

The future is dependent on analytics skills like AI and machine learning for organizational success, but also human advancement. What you're inspired to do today can be a spark for years to come – in health care treatments, therapy discoveries, educational opportunities, sustainable business efforts and more.

According to the 2020 Emerging Jobs Report, data science is growing rapidly across all industries and skills remain in high demand. There's a shortage of talent with an abundance of opportunity. The world needs your brilliance. Let us help you build future-proof skills so you can apply your innovative mind to whatever you dream.

### Give it a try

Enroll in a free trial, or sign up for the full Academy to access e-learning, resources and more to launch or advance your data science career. Work hands on with SAS and open source technologies, like Python and R, and apply your thinking to real-world scenarios.

### Build skills one credential at a time

Keep going after your free trial to dig deeper. Purchase credentials individually and take courses – at your pace – on your path to a SAS Certified Data Scientist.

- Data Curation Professional credential.
- Advanced Analytics Professional credential.
- AI and Machine Learning Professional credential.

Ready to get started? Let your journey begin.
