

SAS® Workforce Transformation Services

A strategic approach to developing your analytics culture.

Attracting and retaining talent is a focal point for organizations looking to stay profitable and competitive. Those that have been successful have taken a closer look at job satisfaction. They can confidently answer: What makes people happy? Why do employees stay? What makes them leave? Can you answer these questions? SAS Workforce Transformation Services can help you identify the needs of your employees. Learn how developing skills improves employee morale and aids in attracting and retaining talent.

Program Overview

SAS Analytics skills are in demand. Our program creates an innovative solution to teach highly sought-after SAS software skills combined with softer business skills. We use a structured approach to introduce efficiencies that improve the quality of how an organization conducts business.

Key Benefits

SAS Workforce Transformation Services boosts employee engagement, sharpens analytics skills and creates an analytics culture of continuous improvement.
