SAS CUSTOMER TRAINING

THE GREAT AiM OF EDUCATiON IS NOT KNOWLEDGE BUT ACTiON

Herbert Spencer

SAS is the world's leader in business analytics software, delivering breakthrough technology that transforms the way you do business. SAS software provides one integrated process for analyzing data from every source, leveraging investments in existing systems and infrastructure.

From financial to performance management, IT portfolio optimization to patent discovery, SAS offers a complete suite of award-winning data management and analytical software designed to give a customer the ultimate reward: The Power to Know®.

SAS believes that training is essential for the successful implementation and the optimal use of software tools. We use a wide range of learning formats to accommodate various kinds of learning styles.

Most popular are:

- **Public Training / Live Web Training**
  A wide range of courses is organized on a regular base in the SAS training facility in Tervuren or virtually as Live Web training.
  This training format creates the opportunity to share experiences with your peers from other organizations. Link this to the input of the trainer and you'll find that all public courses have a tailored approach.

- **Company Specific training**
  The training contents can be customized to match the needs of your employees: we give advice on the duration and contents of the training: from standard to fully customized, including cases / exercises on your data. We agree on the date and location of the training.

- **e-Learning**
  SAS offers a range of e-learning modules: you study at your pace, at the location of your choice and at the most convenient time. All modules are available in English.

SAS focuses on an active and practice-based way of learning, which allows students to transfer the freshly acquired knowledge into action.
Equipped with the knowledge and the skills, SAS-users are ready to face the diverse and often complex challenges faced by our customers.

SAS Public Training – June - December 2018

Below overview shows the dates for the public courses that are organized at SAS Tervuren.

Many more courses are offered as Live Web classes or, in other words, as virtual public training.
This is the perfect alternative for courses that are not organized at SAS Tervuren. With this format you enjoy a classroom experience from your desktop:

- It brings the SAS instructor virtually in your office.
- You ask questions and get answers in real-time.
- You dispose of the same course materials and access to extended learning after the training.
