

SAS Enterprise Analytics Forum

Who's it for?

There are four complementary and interdependent groups involved in creating a successful enterprise analytics strategy. Each group below will benefit from the Forum by building their awareness of the needs and contributions of the others.

ARCHITECTS

The architects are interested in framing the right solution. They need to know where the business is heading and want to know what the analysts are being tasked with. They have to know that ICT is able to support the solution.

ICT

ICT are interested in enabling the right solution. They need to know what the analysts are being tasked with and want to know where the business is heading. They have to know that the solution has been architected.

BUSINESS

The business is interested in leading the right solution. They need to know that the solution has been architected and want to know that ICT is able to support the solution. They have to know what the analysts are being tasked with.

ANALYSTS

The analysts are interested in optimising the right solution. They need to know that ICT is able to support the solution and want to know that the solution has been architected. They have to know where the business is heading.

SAS Enterprise Analytics Forum

The SAS Enterprise Analytics Forum is an invitation-only, exclusive group of architects and business leaders interested in enabling analytics at the enterprise level. Its mission is to foster collaboration around the innovative practices and strategic uses of analytics in enterprise class platforms.

Key Benefits of joining

- Connect with like-minded peers facing similar challenges and opportunities in enterprise architecture
- Better understand your organisation's analytics environment to drive better results and architecture performance
- Consult with global experts on formulating effective strategies to overcome challenges
- Benefit from value added service engagements including SAS architecture reviews and thought leadership workshops.

What commitment is involved?

Members will be expected to:

- Attend four yearly face-to-face meetings
- Contribute to the overall agenda and focus of Forum meetings
