Contents

<i>About This Book</i>	vii
<i>About the Author</i>	xi
Chapter 1 / Introduction to Exploratory Factor Analysis	1
A Tool for Exploration	1
EFA vs PCA	2
Steps to Follow When Conducting EFA	5
Basic Syntax for EFA	7
Summary	9
References	9
Chapter 2 / Extraction Method	11
What Is Extraction?	11
Key Concepts	12
Extraction Techniques	13
Three Pedagogical Examples	15
Example Syntax and Output	16
Does Extraction Method Matter?	20
Summary	25
Exercises	26
Instruments Used in Examples	27
References	31
Chapter 3 / Factor Extraction Criteria	33
How Many Factors?	33
Extraction Criteria	34
Example Syntax and Output	36
How Do the Criteria Compare?	45
Summary	57
Exercises	58
References	58
Chapter 4 / Rotation	61
The Magic of Rotation	61
Types of Rotation	63
Orthogonal vs Oblique Rotation	64
Interpretation of Factor Matrices	65

Example Syntax and Output	66
Which Method?	69
Exploring Multiple Solutions	75
Summary	80
Exercises	81
References	82
Chapter 5 / Sample Size Matters	83
Why Is Sample Size Important?	83
Published Guidelines	84
Sample Size in Practice	85
An Empirical Investigation in Sample Size	86
An Applied Example from Costello & Osborne	87
Application: Impact of Sample Size on Interpretation	89
Summary	93
Exercises	93
References	94
Chapter 6 / Replication Statistics	97
Importance of Replication	97
Let's Bring Replication to EFA	98
Procedural Aspects of Replicability Analysis	99
Quantifying Replicability in EFA	100
Application: Replication of Marsh SDQ Data	102
Summary	109
Exercises	110
References	110
Chapter 7 / Bootstrap Applications	113
How Does Bootstrap Resampling Fit into EFA?	113
The Rise of Resampling	114
Bootstrap Resampling Methods	115
What Can Bootstrap Resampling Do, and What Should It Not Be Used For?	116
Example Syntax and Output	117
Application	126
Summary	137
Exercises	138
References	138
Chapter 8 / Data Cleaning	141
The Importance of Data Cleaning	141

Outliers	142
Application: Random vs Constant Responding	147
Missing Data	149
Application: Nonrandom Missingness and Imputation	152
Summary	155
Exercises	155
References	156
Chapter 9 / Factor Scores	159
Factor Scores 101	159
Example Syntax and Output	160
Application: Factor Score Estimation	162
What Are Modern Alternatives?	168
Summary	169
Exercises	169
References	170
Chapter 10 / Higher-Order Factors	171
What Is a Higher-Order Factor?	171
Did the Initial Solution Get It Right?	172
Mechanics of Performing Second-Order Factor Analysis	173
Application: Replication of Second-Order Factor	177
Summary	179
Exercises	179
References	179
Chapter 11 / After the EFA: Internal Consistency	181
What Comes Next?	181
What Is Cronbach's Alpha (And What Is It Not)?	182
What Is "Good Enough" for Alpha?	184
Factors That Influence Alpha and Its Use	185
Estimation of Alpha in SAS	187
Would Error-Free Measurement Make a Real Difference?	189
Application	191
Summary	202
Exercises	203
References	204
Chapter 12 / Summary and Conclusions	207
Best Practices for EFA	207
References	209
